## 2. Referencing a chapter in a book

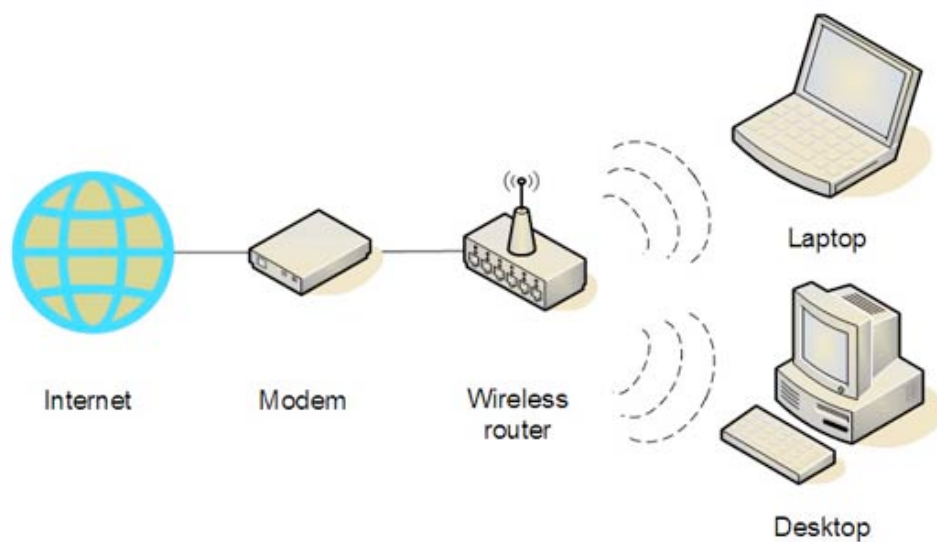

You've read chapter 7 "Wireless Attacks" in the above book and need to reference a page. The page number is 252.

### 3. Image, illustration or table from a book

You have sourced the above graphic from the same book, page 333.

### 4. Image from an online source

You have sourced this image from an online website. The title of the image is Wireless Router. The URL locating the image is <http://www.sitecheat.com/wp-content/uploads/2011/05/wireless-router-network1.jpg>

### 5. How could you reference a photograph or slide?

6. The Computer Misuse Act was introduced in 1990 to secure computer material against unauthorised access or modification. How could I reference this computing legislation?
7. The Data Protection Act 1998 is concerned with information about living individuals which is processed both manually and automatically. It basically gives new rights to those individuals about whom information is recorded, and demands good practice in handling information about people. How could this act be referenced?
8. How could you reference an image/location from a map?
9. Reference the following Thesis using the Harvard Referencing system.

10. WVE is the source for in-depth information on wireless vulnerabilities. It provides a standardized nomenclature for Vulnerabilities in wireless protocols and products, and the Exploits which take advantage of these vulnerabilities. It is also a database or catalogue of these vulnerabilities and exploits. (Wireless Vulnerabilities and Exploits Database Copyright (c) 2005-2008 Aruba Networks, Inc. All rights reserved).

### How To Secure An Office Wireless Network

David Pollino<sup>1</sup>

Available online 8 January 2002.

#### Abstract

Hackers have got a new trick and its worrying organizations with wireless networks. With numerous reports of user identities and passwords being grabbed out of thin air, the so-called 'drive-by' hack, where an attacker attempts to access data from outside an organization's building, is causing a panic across the wireless industry. Here, we will evaluate the real risks associated with implementing a wireless office network and offer some practical tips for improving security.

14. How could you reference a DVD/video?
15. How could I cite the following sentence: "The throughput of a wireless data communications system depends on a number of variables". The sentence came from the above Thesis document listed in part 9.
16. List the full reference for the citation used in step 15.
17. How could you reference an E-book?
